SUMMARY

Frontend Developer with professional experience in React.js, Next.js, TypeScript, and modern web technologies. Skilled in building scalable web applications, integrating RESTful APIs, optimizing application performance, and delivering responsive user interfaces. Passionate about writing clean, maintainable code and developing user-centric digital solutions.

EDUCATION

CDAC ACTS

Post Graduation Diploma in Advance Computing

2024
Pune, India

JSPM's Rajarshi Shahu College Of Engineering

Bachelor of Technology in Computer Science

2019–2023
Pune, India

SKILLS

Languages: Java, JavaScript, TypeScript, SQL

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Redux Toolkit

Backend: Spring Boot, Node.js, REST APIs

Databases: MySQL, MongoDB

Tools: Git, GitLab, Postman, Jira, Confluence

EXPERIENCE

Tata Technologies — Solution Developer

November 2024 – Present

- Implemented JWT token-based authentication with OAuth 2.0 integration, reducing unauthorized access by 30% and improving login success rate to 60.8%.
- Integrated 45+ REST APIs using Axios, achieving 85% endpoint coverage and reducing average response time by 300 ms through optimized payload handling.
- Designed 12+ dynamic forms with React Hook Form validation, reducing user input errors by 65% and submission time by 40%.
- Managed application-wide state using Redux Toolkit with 10+ state slices, reducing component re-renders by 35% and improving overall application performance by 25%.

Horizon FX — Software Developer

January 2023 – October 2023

- Built 8+ responsive React.js modules, reducing UI rendering issues by approximately 30% through reusable component architecture.
- Prepared and maintained 30+ technical documents and process sheets, improving onboarding efficiency and project traceability.
- Optimized over 30 3D assets in Blender and developed interactive HTML/CSS interfaces, improving rendering performance by approximately 25%.
- Designed an interactive presentation system used across 5+ client projects, reducing presentation preparation time by nearly 40%.

PROJECTS

ByteBridge [Code](#)

2024

- Engineered a full-stack food ordering platform using React.js, Spring Boot, and MySQL with a secure token-based ordering workflow.
- Integrated RESTful APIs between the React frontend and Spring Boot backend, ensuring seamless data synchronization and reliable order processing.

ATM Simulator [Code](#)

2023

- An ATM simulator where you can experience using a Virtual ATM Machine.
- Built a desktop banking application using Java and MySQL with secure JDBC connectivity.
- Implemented core banking features including deposits, withdrawals, balance inquiry, mini statements, PIN management, and fast cash transactions.

Achievements & Awards

Achievement: Secured 3rd place with my team at Barclays Tech Innovation Challenge (2019–2020) for proposing an innovative river-cleaning solution.
